Kemet AI Challenge # 1

Named Entity Recognition

What is done:

We use 2 different models for NER (Arabic and English):

1)   https://huggingface.co/marefa-nlp/marefa-ner

2)   https://huggingface.co/hatmimoha/arabic-ner

What is required:

Try to recognize new entities such as:

- Dates
- Times
- Measurement units
- Quantity
- Colors
- Currency
- Age
- Prices

Delivery:

Within one week, you are required to deliver :

1. Production-ready project adhering to established project structure and clean code principles.
2. Provide comprehensive documentation, including:
   a. Instructions for running the project in Docker.
   b. Detailed schemas of requests and responses.
3. Host the completed project in a GitHub repository.
